26 **UNITED STATES DISTRICT COURT**
27
CENTRAL DISTRICT OF CALIFORNIA

28 Intel Corporation,

Plaintiff,

vs.

Nexus Display Technologies LLC,

Defendant.

Case No. 2:15-cv-2142

**INTEL CORPORATION'S
NOTICE OF RELATED
CASES**

1 Pursuant to Local Rule 83-1.3.1, Plaintiff Intel Corporation (“Intel” or
 2 “Plaintiff”) hereby submits its Notice of Related Civil Cases.

3 This case is related to the cases pending at Docket Nos. 14-cv-5691-JVS-
 4 DFM, 14-cv-5693-JVS-DFM,¹ 14-cv-5694-JVS-DFM and 14-cv-1118-JVS-DFM
 5 (collectively “Related Cases”) because it “would entail substantial duplication of
 6 labor if heard by different judges.” L.R. 83-1.3.1(c).

7 In all four Related Cases, Nexus Display Technologies LLC (“Nexus”)
 8 asserts that the defendants’ products infringe certain patents previously assigned to
 9 Silicon Image, including at least U.S. Patent Nos. 7,295,578, 5,835,498, and
 10 7,143,328 Patents (“Asserted Patents”). In this case, Intel is seeking a declaratory
 11 judgment that Intel is licensed to practice those patents, that Intel’s license
 12 authorizes the sale of Intel’s products to its customers, and that the License
 13 Agreement bars any assertion by Nexus of the Licensed Patents against Intel and
 14 components that Intel supplies to its customers.

15 In addition, Nexus’s infringement allegations in the Related Cases appear to
 16 be directed to portions of a display interface standard known as DisplayPort. *See*
 17 Joint Rule 26(f) Report at 6, 14-cv-5694-JVS-DFM (C.D. Cal. July 17, 2014), ECF
 18 No. 37.² In this case, the Intel products as to which Intel is seeking a declaratory
 19 judgment also comply with portions of the DisplayPort standard, including aspects
 20 of the DisplayPort standard that are likely to be complementary to those at issue in
 21 the Related Cases. Thus, the underlying technologies at issue in the Related Cases
 22 are likely to be substantially similar to those at issue in this case.

23 Substantial efficiencies would be gained by having the same Judge presiding
 24 over the Related Cases apply his knowledge of the Asserted Patents and the
 25 DisplayPort standard to the Intel products at issue when determining whether those

26 ¹ This case was terminated on March 9, 2015.

27 ² DisplayPort was developed by the Video Electronics Standards Association (VESA) as a digital
 28 interface to connect a video source to a display device, such as a monitor.

1 Intel products are covered by the License Agreement. Therefore, there would be
2 substantial duplication of labor if this case were heard by a different Judge.
